

HIGH PERFORMANCE FLAT MOPS

Cleaning up the Environment One Room at a Time

UMF-FM750WK900AM: A unique material developed as the “working surface” for a variety of high performance “TRUE” color-coded Flat Mops. The FM750WK900AM evolved resulting from extensive prototyping (29+) and testing to ensure maximum performance while reducing drag on all types of environmental surfaces. The FM750WK900AM material offers the highest concentration of ultra-MICRO-fiber of any product available. The FM-Series of PerfectCLEAN® flat mops also has the advantage of a proprietary Hook & Loop backing material - *PermaLOOP™*. PerfectCLEAN Flat Mops are compatible with any commercial process, they are chlorine stable and withstands temperatures up to 210° F thus ensuring a *clinically acceptable process* for health care. Use damp to meet every challenge or application.

- PerfectCLEAN® is made from the highest quality micro-denier bi-component fiber available.
- Durable and chlorine stable - designed to meet CDC guidelines for Blood Borne Pathogens.
- In-service validation at leading hospitals & hotels supports increased HCAHPS and Guest Satisfaction Scores
- Pharmaceutical clean-room SOP and “validation” demonstrates that PerfectCLEAN eliminates endotoxins from surfaces – Helmke Drum test supports Class-10 and below.
- PerfectCLEAN penetrates invisible crevices in surfaces to cut out dirt & grime and “trap & remove” contaminants.
- Saves up to 50% in time and labor - PerfectCLEAN does most of the work.
- Highest absorption capacity of any product tested and *absorbs it faster*.
- True Color-coding for distinguishing between bathroom, patient room, food prep or any other use.
- Helps reduce cross-contamination.

FLAT MOPS ~ DAMP
